

GCD Security Centre Ltd.

GCD Security Centre Ltd (GCD) provides security products from padlocks and chains, to an extensive range of locks and ironmongery, CCTV equipment, burglar alarms and installation services. We are CHAS accredited, an accredited Investor in People (IIP), an approved company member of the Master Locksmiths Association (MLA), and a member of the National Association of Installation Companies (NASIC).

We are committed to meeting all specified requirements of our customers and seek to satisfy and where possible exceed their expectations.

We are committed and passionate about caring for the environment and fully accept our responsibility to reduce the negative and increase the positive environmental impact of our activities and services. We understand and support the link between the company, the environment and the UK's wider commitment to sustainable development.

The following have been identified as having an environmental impact;

Energy: We will monitor and minimise the consumption of non-renewable energy sources and will seek to implement renewable or low carbon technologies where possible.

Waste: We will monitor and minimise waste generation, through implementing the waste hierarchy of reduce, reuse and recycle. We are always striving for new opportunities to minimise our generation of waste where possible.

Transport: We will monitor and minimise our carbon emissions associated with business travel. We will take account of environmental considerations such as developments in fuel and vehicle technology, when acquiring new company vehicles. Our vehicles are regularly maintained and serviced to ensure their efficiency and to minimise GHG emissions.

We have in place a central control system for the monitoring of energy, transport emissions and waste production. This central point is used to set measurable environmental objectives and targets. We then monitor, review and set targets on an annual basis.

Procurement: Where the control of specification of products lies with ourselves and where economically viable we strive to source from local/national suppliers.

Staff/sub-contractors are educated on the policy through staff induction, notice boards and training and we ensure that employees are aware of their responsibilities and understand how they can meet them effectively.

Staff are encouraged to suggest new ideas to continually develop our sustainability initiatives across the organisation.

Our environmental policy is available to stakeholders via the GCD website (gcdsecurity.co.uk).

**Paul Hickman,
Managing Director**
